Master of Dental Surgery -MDS

Master of Dental Surgery or MDS is pursued by students who have graduated in Dental Science or completed BDS. It deals with dental issues in detail and students become masters in dental surgeries. The normal duration of MDS course is three years. However, those who have completed any PG Diploma that is recognized by the Dental Council of India (DCI) can do this in two years.

MDS is recognized by the Dental Council of India (DCI) and is offered in various specializations including Conservative Dentistry and Endodontics, Periodontology, Prosthodontics and Crown & Bridge, Oral & Maxillofacial Surgery, Orthodontics and Oral Medicine, and Radiology. StudyOBG provides courses and study materials to help students to complete their MDS course with ease. Our courses supported with the most advanced digital line of products make learning simpler and easier.
